Andy,

If you do not already have these slides, these are the ones James was referring to from the original NJ briefing.

Subject: RE: R2 NJ Briefing

These plots are for the NTA compounds to go along with the targeted maps that Seth has. It's easy to regenerate them in different forms if needed (topo vs. satellite, different normalization etc.)

Mark has slides with the MS spectra for identification of the novel compounds as well if desired.

Subject: FW: R2 NJ Briefing

All,

Tim has asked us to prepare a briefing on the results so far for New Jersey DEP program. It may actually be two briefings, one for R2 senior folks and another for ORD - I'm not sure.

If you could please send me any slides or data summaries you may have from any of our previous NJ DEP presentations I'll put together a basic outline for this talk.

I think we're mainly looking for the water data for the legacy materials with some evaluation of the percent branching for PFNA.

I've attached a draft of a draft above. Please send me what you can.

Thank you very much,

Andy

Subject: R2 NJ Briefing

Andy,

We talked a while ago about the need to pull together a high-level briefing on what we are finding in NJ. As you know, Nidal has schedule a briefing for R2 senior management for 9/25. Jennifer OZ is also asking for a briefing to her and Program Offices (as yet unscheduled). It was my understanding that you were going to pull a draft together. Can you let me know where you are with this?

Thanks.

Tim
